

## Annual SPIRIT card award for the period 4Q/ 2019 to 3Q/ 2020

We are pleased to announce that as per the BBS Award scheme which was commenced in year 2015 and replaced the earlier crew commendation award scheme of 2013, we have now reviewed and selected the three (3) best SPIRIT cards submitted on board Unix/ TMS fleet during the period **from 4th quarter of 2019 to 3rd quarter of 2020.**

At sea, during tank cleaning operation, I noticed one crew having a hard time disconnecting the hose used for P/V washing. He was forced to remove the pressurized hose connected at seawater line and did not notice that the valve was still opened. The seawater line was still working with a temperature above 95C since the 9S tank is still at the process of hot wash.

I noticed that the valve is still open and immediately halt the crew from forcing it to disconnect.

I told him that it is dangerous forcing to disconnect any hose with valve open. I closed the valve first then easily disconnected the hose and transferred it to freshwater line. I advised my crewmate to say focus on what he is doing and observe safety at all times to avoid any accident occur during our tank cleaning operation

On date 05<sup>th</sup> June 2020, during top overhauling of No.1 A/E, it was observed that one of the crew was handling a spare Cyl. head by bending his body's upper part. As the Cyl. Head is heavy, it should be handled carefully keeping the body upright, otherwise it may cause severe injury to the backbone.

Immediately I stopped and briefed about proper procedure of handling these types of heavy parts.

During the last week of September, he observed that ship email system received a lot of spam mail with attachment of Malware (PASSWORD PROTECTED ZIP FILE), sender using and pretending name of staff from Unix Line and MOLCT office. They also using email subject which recently sent by our office.

Reported to master and notice to all officers not to open such attachment. Also informed the Unix System Control for the above security threat. Unix System Control team informed to Dialog email system to apply new filtering rule to remove the password protected attachment(.ZIP) Malware form the ship receiving email.

***Congratulations for the above three winners. Each of 3 listed crew are entitled to US\$1,500 each. For payment mode kindly contact the Crew Accounting Team in Unix. This award is for the crew personal use and not the entitlement of the ship he had served. Only if the crew member has left the services of the company than an exception may be made which to be confirmed from Unix Marine Director.***
