

## Annual SPIRIT card award for the period 4Q- 2023 to 3Q- 2024

We are pleased to announce that as per the BBS Award scheme, we have now reviewed and selected the three (3) best SPIRIT cards submitted on board Unix/ TMS fleet during the period from **4th quarter of 2023 to 3rd quarter of 2024.**

One of the ER crew was about to open FO purifier inspection hole for checking leaks. He was immediately stopped by the APEN as the crew did not check how much time was left for the next auto-desludging. Crew was advised by the APEN to first check time remaining for next auto de-sludging and do not open the inspection cover when nearing the auto desludging cycle to prevent any injury. This was also discussed with other crew during the toolbox meeting.

While renewing the lagging of FW line for emergency shower, bosun felt strong smell of chemical near 10S pump stack. Work was immediately stopped and found out that the strong chemical smell was coming from the place where all chemicals & detergents were stored. Underneath, it was seen drop leakage of Nitric Acid from the plastic drum which had cracked. Immediately, chief officer was notified and then bosun asked crew to transfer the chemical from the leaking drum into another drum after using proper PPE. Leaked quantity on deck was washed with water and cleaned with rags.

While vessel was alongside in port of Gdansk, terminal requested to adjust vessel position by ropes without disconnecting the hose and securing the gangway as the shifting was 1-2 meters only. Chief Officer explained to loading master that for safe operations vessel needs to clear the gangway and disconnect the cargo hose. The terminal & loading master agreed, and the shifting was done in a safe manner.
